Tool Information

Feature Help (<http://plusthis.com/support/segment-list/>)

Allows you to segment a portion of, or your entire, list of contacts into multiple segments, selecting contacts at random for each segment.

Segment Definitions

Add segments, and choose which tag should be applied to each segment. This tag will be applied to the contacts randomly selected for this segment.

Additional Options

Choose how to divide your list. By default, contacts will be split between the defined segments evenly. The weighted option allows you to choose what percentage of contacts are placed in each segment.
